TWENTY INCHES OF SNOW FALLS

DENVER HAS SEVERE SNOW STORM AND PRECIPITATION IS HEAVIEST ON RECORD.

Trains Have Been Greatly Delayed and Some City Streets Have Been Rendered Impassable.

Denver, Col., Oct. 24.—The snowstorm which began last Friday night still continues throughout Eastern Colorado, Southern Wyoming, Northern New Mexico, Western Texas and Western Kansas and Nebraska. Clearing weather in this region today is promised by the Weather Bureau. It is said to be the heaviest October snowstorm here of which there is any record. The total snowfall in Denver up to last midnight was twenty inches, and several inches have fallen since that hour. The temperature continues to hover around the freezing mark, and thus far but comparatively little damage has been done.

According to stockmen who are in Denver, the cattle on the range will not suffer greatly as a result of the storm. They are said to be in excellent condition and well able to withstand a hard storm.

Trains on both the mountain and prairie roads have been greatly delayed and some city streets have been rendered almost impassable. Otherwise no serious consequences have yet resulted from the storm in this vicinity.

Wichita, Kas., Oct. 24.—This section of the State experienced the first touch of winter this morning when a temperature of 40 degrees above zero was registered, a drop of 31 degrees since yesterday. At intervals today rain has fallen. A steady rain is falling in Oklahoma today and the temperature is 38.

Dog Is Dying of Grief.

Marion, Ohio, Oct. 24.—Rex is the name of the little brown fox terrier that is grieving itself to death over his late master, O. Guy Johnson, a young merchant who committed suicide several weeks ago, following to the grave his sweetheart, Miss Cora White, aged 19, who drank carbolic acid after quarreling with him.

Johnson loved his dogs (he had two) but he loved Rex the most because nobody else seemed to care for him. In his farewell letters Johnson asked his friends to adopt Rex, but the ugly little canine refused to be adopted and became a vagabond. Until recently Rex took food when it was thrown to him, but now he refuses to eat.

WILL BECOME A FRIAR

RACETRACK TOUT AND CAPPER TIREDS OF THE LIFE AND WILL RETIRE TO A MONASTERY.

Chicago, Oct. 24.—After a career of ten years as an actor, book agent, capper for gamblers and follower of the race track, Harry Monahan, known generally among the sporting fraternity throughout the Middle West, has repented and decided to abandon that kind of a life. He will enter the monastery of the Trappist Monks at Dubuque, Ia. He will depart for Iowa today, and it is his purpose to spend the remainder of his life in their cloister, where chastity and obedience are enforced.

Monahan was born in New York city thirty-three years ago and his parents were wealthy. He was graduated from a Catholic college and then took up the study of law, being admitted to practice in New York State. He came to Chicago eleven years ago and opened an office on Dearborn street. He abandoned law six months later and formed the acquaintance of many followers of the races. He acquired wealth, but became reckless and lost heavily through wild plunges. Years ago he again became penitent and decided to follow the county fairs. He became a nervous wreck. He traveled throughout the middle west with gamblers and three years ago engaged in a shooting affray in Wisconsin for which he served six months in jail.

Ten Cents' Worth of Stove Putty

—May Cost You \$200 In Fuel In the Next Three to Five Years.

WHEN you buy your stove, you can't see the stove putty in the joints and seams.

But in a month or two, you'll be wondering why it takes so much fuel to heat the room.

The putty has shrunk up and fallen out, and there's a big crack to suck in cold air.

It is not surprising that perfect combustion of fuel is impossible under these conditions—

That your fire goes out on cold nights—

And that your winter's coal bill is twice what it ought to be at the end of the season.

Throw away your imitation stove with puffed joints—the longer you use it the more it will cost you.

Save the heating energy of your fuel by using Cole's Original Air-Tight Wood Stove for Wood, or Cole's Original Hot Blast Coal Stove for Coal.

These wonderful heaters have a practically jointless construction, without a grain of stove putty in them. The patented air-tight construction holds back all the gases wasted with other stoves until they are burned, hence but half the usual amount of fuel is required.
